

USER STORY 14 -TRANSITION CHANGE REQUEST FROM SUBMITTED TO IN DISCUSSION.

Section	Content
Card	As a Project Manager, I want to move a Change Request from SUBMITTED to IN_DISCUSSION, so that I can flag the CR as requiring clarification and initiate a discussion with the customer.
Summary	PM transitions a CR from SUBMITTED to IN_DISCUSSION to indicate that the requirement needs further clarification before it can be processed.
In-scope	- View a CR currently in SUBMITTED status. - Click the action button to move CR to IN_DISCUSSION. - Mandatory entry of a comment explaining the reason for the discussion request. - The system saves the new status and logs the comment with a timestamp.
Out of scope	- Transitioning the CR to any status other than IN_DISCUSSION from SUBMITTED.
Trigger	Click button “In discussion”
Pre-condition	- The PM is logged into the system with appropriate permissions. - The Change Request is currently in SUBMITTED status.
Business rule and error message	Rule : The status change to IN_DISCUSSION can only be saved if the PM has entered text in the comment field → Error 1: "Please enter a comment detailing the clarification needed before changing the status." Rule : This action is only available when the CR is in SUBMITTED status. The button is hidden/disabled for any other status.
Screen design	CR Detail Modal

	
Acceptance Criteria	AC1 – Successful Transition: Given the PM is viewing a SUBMITTED CR, when they enter a comment and click "In Discussion", then the system saves the new IN DISCUSSION status, logs the comment, and refreshes the CR detail view. AC2 – Missing Comment Blocked: Given the PM leaves the comment box empty, when they attempt to change the status, then the system blocks the action and displays Error 1. AC3 – Button Availability: Given the PM views a CR that is NOT in SUBMITTED status, then the “Go to Discussion” action button is hidden or disabled.

USER STORY 15 - MOVE CHANGE REQUEST FROM IN DISCUSSION TO REJECTED.

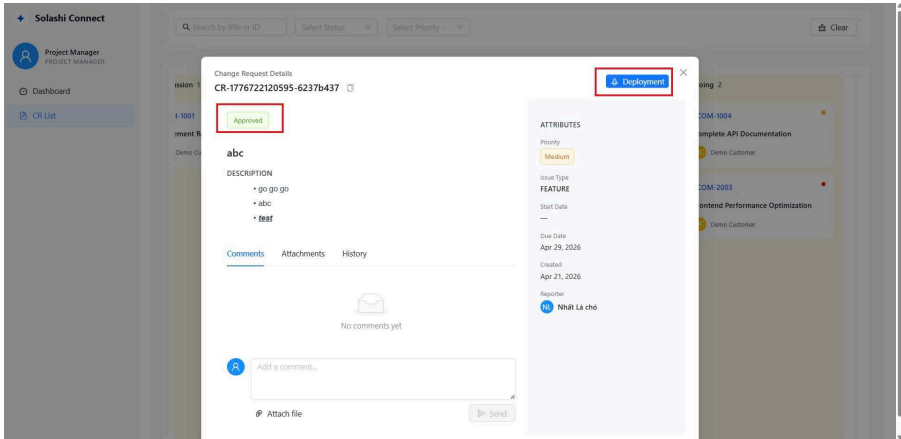

Section	Content
Card	As a Project Manager , I want to Reject a Change Request that is in IN_DISCUSSION status , so that I can formally close an infeasible or invalid request and notify relevant stakeholders.
Summary	PM rejects a CR that is currently IN_DISCUSSION, transitioning it to REJECTED status with a mandatory rejection reason.

In-scope	- View a CR in IN_DISCUSSION status. - Click the "Reject" action button. - Mandatory entry of a rejection reason/comment. - System transitions CR to REJECTED status and logs the reason with a timestamp.
Out of scope	- Transitioning the CR to any status other than REJECTED from IN_DISCUSSION.
Trigger	- Click the button “Reject” in CR detail.
Pre-condition	- The PM is logged into the system with appropriate permissions. - The Change Request is currently in IN_DISCUSSION status.
Business rule and error message	Rule 1: The status change to REJECTED can only be saved if the PM has entered text providing a rejection reason. → Error 1: "Please enter a reason for rejecting this Change Request." Rule 2: This action is only available when the CR is in IN_DISCUSSION status. The button is hidden/disabled for any other status.
Screen design	CR Detail Modal 

Acceptance Criteria	AC1 – Successful Rejection: Given the PM is viewing an IN_DISCUSSION CR, when they enter a rejection reason and click "Confirm Reject", then the system saves the REJECTED status, logs the reason, and updates the CR card on the Kanban Board. AC2 – Missing Reason Blocked: Given the PM leaves the rejection reason field empty, when they click "Confirm Reject", then the system blocks the action and displays Error 1. AC3 – Button Availability: Given the PM views a CR that is NOT in IN_DISCUSSION status, then the "Reject" action button is hidden or disabled. AC4 – Rejection Logged: Given a CR has been successfully rejected, when the PM views the CR detail, then the comment/activity history shows the rejection reason with the PM's name and timestamp.

USER STORY 16 - TRANSITION CHANGE REQUEST FROM APPROVED TO ON GOING.

Section	Content
Card	As a Project Manager, I want to transition a Change Request from APPROVED to ON_GOING, so that I can officially signal that the development team has started working on the approved request.
Summary	PM moves an APPROVED CR to ON_GOING status to formally indicate that implementation work has commenced.
In-scope	- View a CR currently in APPROVED status. - Click the "Start / Move to On Going" action button. - Optional comment to provide a start note or context. - The system transitions CR to ON_GOING and records the action log with a timestamp.
Out of scope	Transitioning from any status other than APPROVED to ON_GOING.
Trigger	Click the button “Deployment” in CR detail.

Pre-condition	The PM is logged into the system with appropriate permissions. The Change Request is currently in APPROVED status.
Business rule and error message	- Rule: The "Move to On Going" action is only available when the CR is in APPROVED status. The button is hidden/disabled for all other statuses→Error : "Failed to update status. Please try again." - Rule: A comment is not mandatory for this transition; however, the comment field is available for the PM to record a start note.
Screen design	CR Detail Modal 
Acceptance Criteria	AC1 – Successful Transition: Given the PM is viewing an APPROVED CR, when they click "Move to On Going", then the system updates the CR status to ON_GOING and moves the card to the ON_GOING column on the Kanban Board. AC2 – Activity Log Updated: Given the status has been successfully changed, when the PM views the activity history, then the log shows the APPROVED → ON_GOING transition. AC3 – Button Availability: Given the PM views a CR that is NOT in APPROVED status, then the "Move to On Going" button is hidden. AC4 – Optional Comment Saved: Given the PM enters an optional start note before confirming, when the transition is saved, then the comment is recorded in the activity history.

USER STORY 17- CLOSE CHANGE REQUEST FROM ON GOING STATE.

Section	Content
Card	As a Project Manager , I want to close a Change Request that is ON_GOING , so that I can mark the request as completed and formally end its lifecycle in the system.
Summary	PM transitions an ON_GOING CR to CLOSED status to confirm that the implementation has been completed and the CR lifecycle is finished.
In-scope	- View a CR currently in ON_GOING status. - Click the "Complete " action button. - Mandatory entry of a closing note/comment confirming completion. - System transitions CR to CLOSED.
Out of scope	Transitioning from any status other than ON_GOING to CLOSED.
Trigger	- Click the button “Complete” in CR detail.
Pre-condition	- The PM is logged into the system with appropriate permissions. - The Change Request is currently in ON_GOING status.
Business rule and error message	Rule 1 : The "Complete" action is only available when the CR is in ON_GOING status. The button is hidden/disabled for all other statuses. Rule 2 : CLOSED is a terminal state. No further status transitions are allowed once a CR is CLOSED.
Screen design	CR Detail Modal

	 The screenshot displays the Solashi Connect Project Manager interface. A modal window titled 'Change Request Details' for ECOM-1004 is open. The modal has a 'Go on going' button highlighted with a red box. The background shows a Kanban board with columns for 'On going' and 'Closed 2'.
Acceptance Criteria	AC1 – Successful Closure: Given the PM is viewing an ON_GOING CR, when they enter a closing note and click "Confirm Close", then the system updates the status to CLOSED and moves the card to the CLOSED column on the Kanban Board. AC2 – Button Availability: Given the PM views a CR that is NOT in ON_GOING status, then the "Close CR" button is hidden or disabled. AC3 – CLOSED State is Final: Given a CR has been successfully moved to CLOSED, when the PM views the CR detail, then no status-change action buttons are available.
