

USER STORY 1 - LOGIN

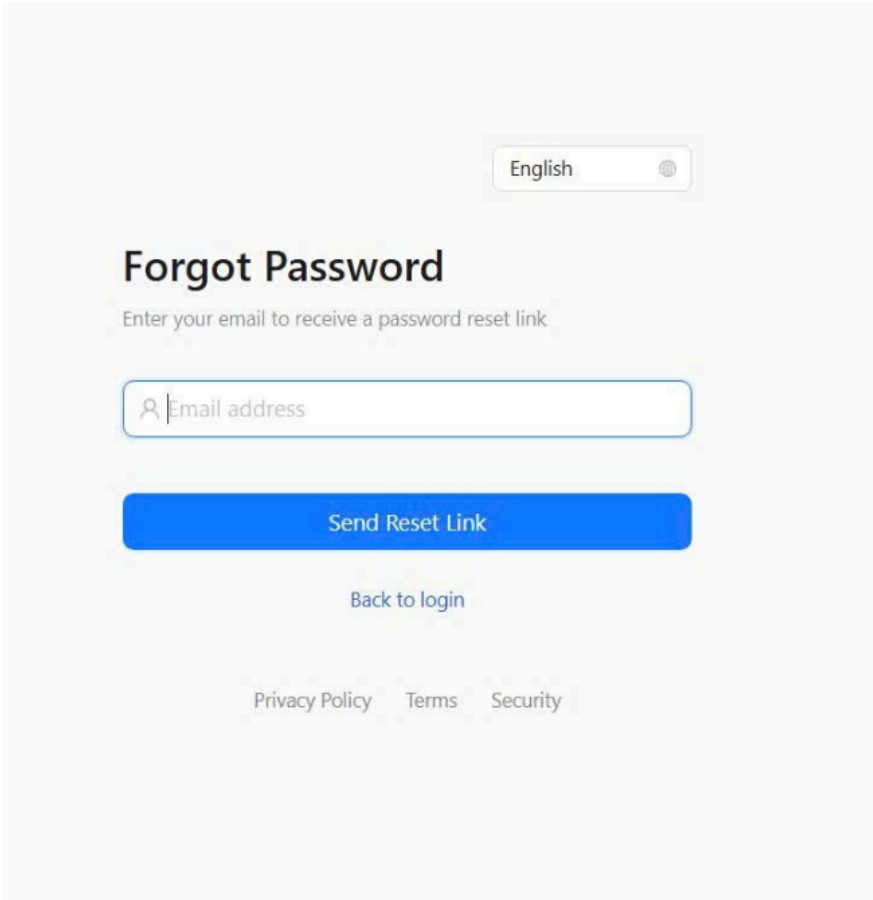

Section	Content
Card	As a System User I want to log into the system So that I can securely access my account and use system features
Summary	The system user enters credentials (email and password) into the login form, the system validates the information against stored user data, and upon successful authentication redirects the user to the dashboard with appropriate permissions based on their role.
In-scope	- Login with email/password - Forgot password (send reset email) - Change language (e.g., EN/VI) - Edit profile (name, avatar, contact info) - Delete account (with confirmation)
Out of scope	- Login via Google/Facebook - Advanced role-based access control (detailed RBAC) - Account restoration after deletion
Trigger	The process is initiated when the user accesses the login page and submits their email and password by clicking the “Login” button.
Pre-condition	- User account exists in the system - User is not logged in
Business rule and error message	Rule: Credentials must match an existing account → Error: "Invalid email or password" Rule: Account must be active → Error: "Account is inactive or disabled"
Acceptance Criteria	AC1: Given user enters valid email and password When user clicks Login Then system authenticates and redirects user to dashboard AC2: Given user enters invalid credentials When user clicks Login Then system displays "Invalid email or password"

Section	Content
	AC3: Given user account is inactive When user attempts to login Then system denies access and shows "Account is inactive or disabled"
Screenshot	

USER STORY 2 - FORGOT PASSWORD

Section	Content
Card	As a System User I want to reset my password

Section	Content
	So that I can regain access to my account if I forget my credentials
Summary	The system user requests a password reset by providing their registered email address, the system verifies the email, sends a reset link, and allows the user to create a new password securely.
In-scope	- Input email - Send password reset link - Create new password
Out of scope	- SMS-based reset - Security questions
Trigger	The process starts when the user clicks the “Forgot Password” link on the login page and submits their registered email address.
Pre-condition	User account exists
Business rule and error message	Rule: Email must be provided and valid → Error: "Invalid email format" Rule: Email must exist in system → Error: "Email not found" Rule: Reset link must be valid → Error: "Reset link is invalid or expired"
Acceptance Criteria	AC1: Given user enters a registered email When user submits forgot password request Then system sends a password reset link AC2: Given user enters an email that does not exist When user submits request Then system shows "Email not found" AC3: Given user accesses a valid reset link When user sets a new password Then system updates the password successfully

Section	Content
Screenshot	

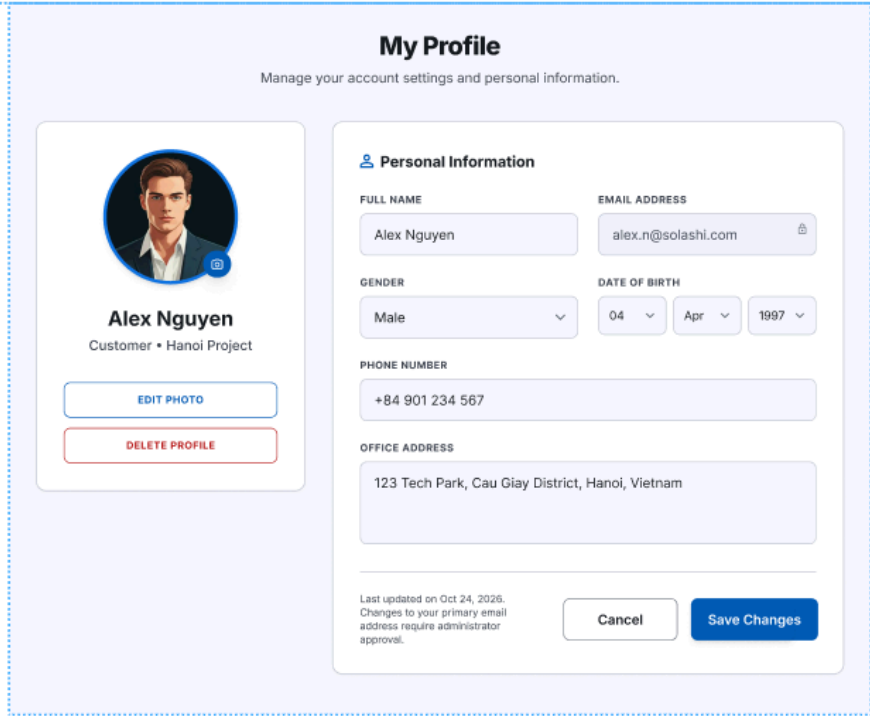

USER STORY 3 - CHANGE LANGUAGE

Section	Content
Card	As a System User I want to change the system language So that I can use the system in a language I understand
Summary	System user selects a preferred language from the available options, and the system immediately updates all interface elements (labels, messages, navigation) to reflect the selected language.
In-scope	- Select language from list - Apply UI changes instantly

Section	Content
Out of scope	Custom language configuration
Trigger	The process is triggered when the user selects a different language option from the system settings or header menu.
Pre-condition	User is logged in
Business rule and error message	Rule: Only supported languages can be selected Error: "Language not supported"
Acceptance Criteria	AC1: Given user selects a supported language When user changes language Then system updates all UI text to the selected language AC2: Given user refreshes the page When system reloads Then selected language remains applied
Screenshot	 The screenshot displays the 'SOLASHIコネクトプロジェクト' (SOLASHI Connect Project) dashboard. The interface is in Japanese. At the top, there's a header with the user's name 'Nhật Lê cho' and a language selector set to '日本語'. The main content area features a 'ステータス概要' (Status Overview) section with a donut chart showing '25 Total work item'. To the right of the chart, a legend lists various statuses: '下書き: 1' (Draft: 1), 'SUBMITTED: 2', '待処理: 1' (Pending: 1), '承認済み: 5' (Approved: 5), 'ON GOING: 2', and '却下 / ブロック: 2' (Rejected / Blocked: 2). Above the chart, four summary cards show counts for 'CR完了' (CR Completed: 9), '更新済み' (Updated: 8), '作成済み' (Created: 5), and '期限間近' (Near Deadline: 3). On the right side, a '最近のアクティビティ' (Recent Activity) log shows a series of project manager updates and status changes, such as 'Project Manager コメントしました' and 'Project Manager ステータスを更新しました'.

USER STORY 4 - EDIT PROFILE

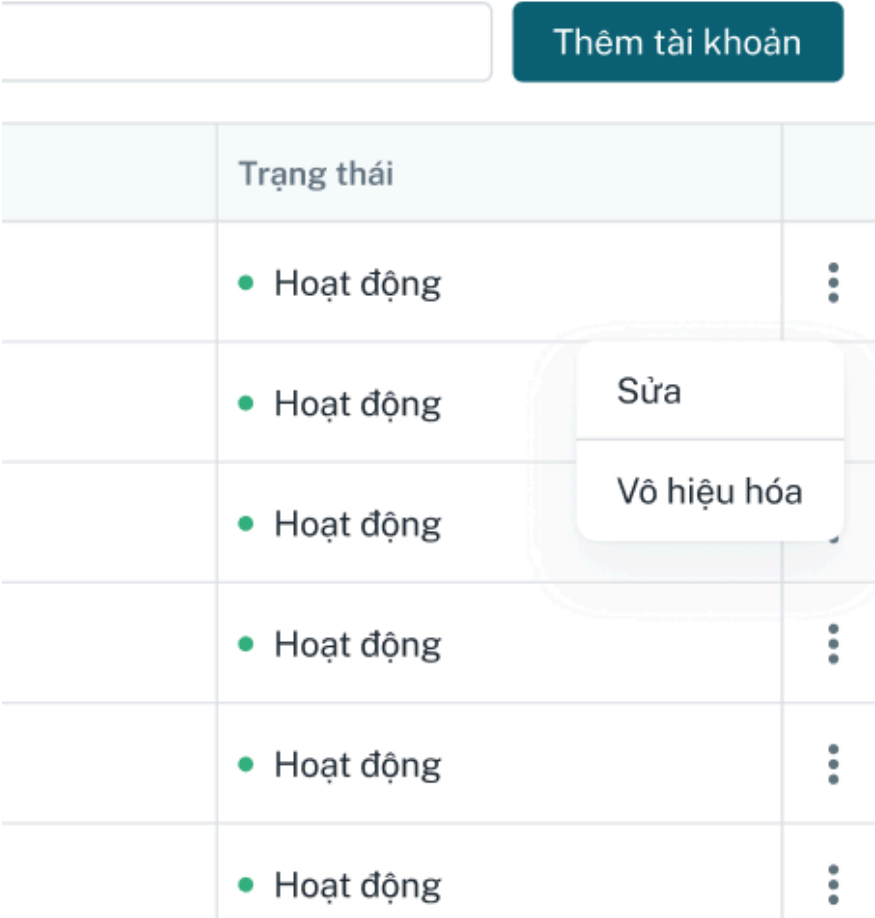

Section	Content
Card	As a Customer/PM I want to edit my profile information So that my personal details remain accurate and up to date
Summary	Customer or PM accesses their profile page, updates personal information such as name, email, or avatar, and saves the changes, which are then validated and stored in the system.
In-scope	- Edit name, email, avatar - Save profile changes
Out of scope	- Change user role - Change system permissions
Trigger	The process begins when the user navigates to the profile page and clicks the “Edit Profile” button to modify their information.
Pre-condition	User is logged in
Business rule and error message	Rule: Required fields must not be empty → Error: "Required fields cannot be empty" Rule: Email must be unique → Error: "Email already exists"
Acceptance Criteria	AC1: Given user enters valid profile information When user clicks Save Then system updates and displays the new profile data AC2: Given user leaves required fields empty When user clicks Save Then system shows "Required fields cannot be empty" AC3: Given user enters an email that already exists

Section	Content
	When user clicks Save Then system shows "Email already exists"
Screenshot	 The screenshot displays a 'My Profile' page with the following elements: Header: 'My Profile' title and subtitle 'Manage your account settings and personal information.' User Card: - Profile picture of a man. - Name: Alex Nguyen - Role: Customer • Hanoi Project - Buttons: 'EDIT PHOTO' and 'DELETE PROFILE'. Personal Information Form: Full Name: Alex Nguyen Email Address: alex.n@solashi.com (with a lock icon) Gender: Male (dropdown menu) Date of Birth: 04 / Apr / 1997 (dropdown menus) Phone Number: +84 901 234 567 Office Address: 123 Tech Park, Cau Giay District, Hanoi, Vietnam Footer: - Text: 'Last updated on Oct 24, 2026. Changes to your primary email address require administrator approval.' - Buttons: 'Cancel' and 'Save Changes'.

USER STORY 5 - DELETE ACCOUNT

Section	Content
Card	As a Customer/PM I want to delete my account So that I can permanently stop using the system
Summary	Customer or PM initiates account deletion from the profile settings, confirms the action, and the system permanently removes the account and associated access from the system.
In-scope	- Request account deletion - Confirm deletion action - Remove account

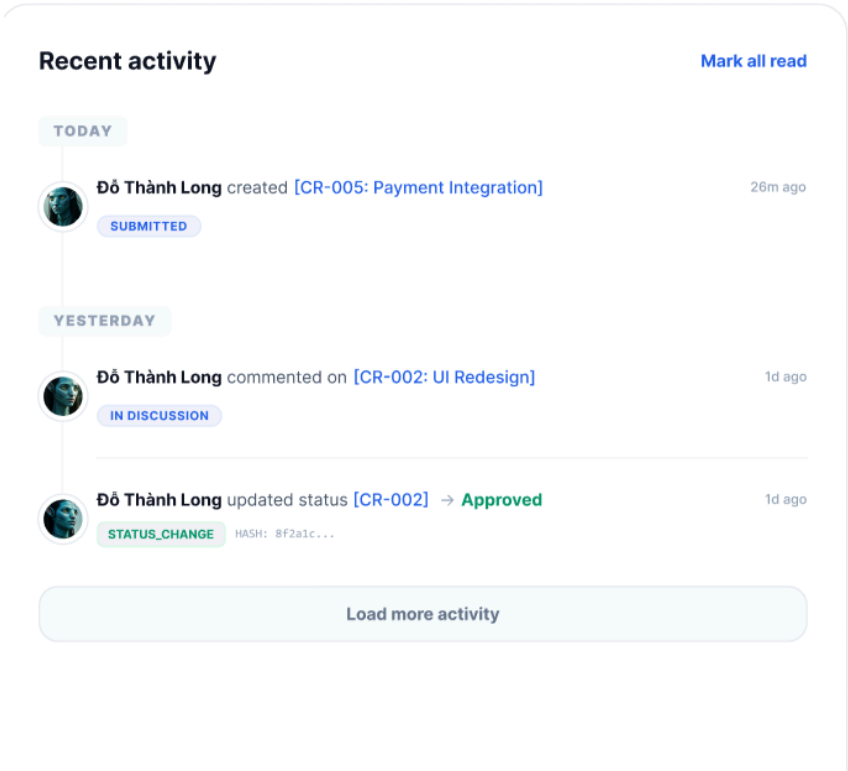

Section	Content
Out of scope	- Account recovery - Data backup
Trigger	The process is triggered when the user selects the “Delete Account” option and confirms the deletion request.
Pre-condition	User is logged in
Business rule and error message	Rule: User must confirm deletion → Error: "Action not confirmed"
Acceptance Criteria	AC1: Given user clicks Delete Account and confirms action When user submits confirmation Then system deletes account and logs user out AC2: Given user clicks Delete Account When user cancels confirmation Then system does not delete account

Section	Content
Screenshot	 The screenshot displays a web application interface. At the top, there is a search bar and a dark blue button labeled 'Thêm tài khoản'. Below this is a table with a header row containing 'Trạng thái'. The table has six data rows, each starting with a green dot followed by the text 'Hoạt động'. To the right of each row is a vertical ellipsis icon. A context menu is open over the second row, showing two options: 'Sửa' and 'Vô hiệu hóa'.

USER STORY 6 - VIEW RECENT ACTIVITY

Section	Content
Card	As a System User

Section	Content
	I want to view recent workflow activities So that I can stay updated on the latest changes in the system
Summary	System user access the dashboard where recent activities related to Change Requests (such as creation, updates, comments, status changes) are displayed in chronological order.
In-scope	- Display recent activities - Show timestamps and actions
Out of scope	- Activity analytics - Export reports
Trigger	The process starts when the user logs in successfully or navigates to the dashboard page.
Pre-condition	- User is logged in - System has activity data
Business rule and error message	Rule: Only user-related activities are displayed → Error: "No activity found"
Acceptance Criteria	AC1: Given user is on dashboard When page loads Then system displays recent activities sorted by latest AC2: Given no activity exists When user views dashboard Then system shows "No activity found"

Section	Content
Screenshot	 The screenshot displays a 'Recent activity' section with a 'Mark all read' link. It lists three activities by user 'Đỗ Thành Long': Activity 1: Created '[CR-005: Payment Integration]' 26m ago. Status: SUBMITTED. Activity 2: Commented on '[CR-002: UI Redesign]' 1d ago. Status: IN DISCUSSION. Activity 3: Updated status '[CR-002]' to 'Approved' 1d ago. Status: STATUS_CHANGE. Includes a hash: 8f2a1c... A 'Load more activity' button is located at the bottom of the feed.

USER STORY 7 - VIEW CR LIST

Section	Content
Card	As a System User I want to view the list of Change Requests So that I can monitor and manage requests

Section	Content
Summary	System user navigates to the Change Request list page where all relevant CRs are displayed based on their role, with customers only able to view CRs in Draft status.
In-scope	- Display CR list - Role-based filtering
Out of scope	Editing CR
Trigger	The process is triggered when the user selects the Change Request module or navigates to the CR list page.
Pre-condition	- User is logged in - CR data exists
Business rule and error message	Rule: Customer can only view their own Draft CR → Error: "Access denied" Rule: PM can view all CRs → Error: "Access denied"
Acceptance Criteria	AC1: Given user is a Customer When user views CR list Then system displays only their own Draft CRs AC2: Given user is a PM When user views CR list Then system displays all CRs AC3: Given user does not have permission When accessing CR list Then system shows "Access denied"

Section	Content

USER STORY 8 - FILTER / SEARCH CR

Section	Content
Card	As a System User I want to filter and search Change Requests So that I can quickly find relevant requests
Summary	System user applies filters such as status and priority or enters keywords (title or ID) into the search bar, and the system dynamically returns matching Change Requests.
In-scope	- Filter by status - Filter by priority - Search by title or ID
Out of scope	Advanced search (AI, fuzzy search)
Trigger	The process begins when the user interacts with the search bar or selects filter options on the CR list page.
Pre-condition	- User is logged in - CR data exists
Business rule and error message	Rule: Search/filter must match existing data → Error: "No matching results found"
Acceptance Criteria	AC1: Given user applies filter or enters search keyword When user clicks Search/Apply Then system displays matching CRs AC2: Given no CR matches the criteria When search/filter is applied Then system shows "No matching results found"

USER STORY 9 - COMMENT + ATTACH FILE

Section	Content
Card	As a Customer/PM I want to comment and attach files to a Change Request So that I can provide additional context and supporting documents
Summary	Customer or PM opens a Change Request detail page, writes a comment, optionally attaches files, and submits the input, which is then stored and displayed in the CR activity thread.
In-scope	- Add comment - Upload attachment - Display comment history
Out of scope	- File versioning - File editing

Section	Content
Trigger	The process is triggered when the user enters a comment and clicks the “Submit” button on the Change Request detail page.
Pre-condition	User is logged in - CR exists - User has permission to access CR
Business rule and error message	Rule: Comment must not be empty → Error: "Comment is required" Rule: File must be valid (type/size) → Error: "Invalid file upload"
Acceptance Criteria	AC1: Given user enters a valid comment When user clicks Submit Then system saves and displays the comment AC2: Given user attaches a valid file When user submits comment Then system uploads file successfully AC3: Given user submits empty comment When no file is attached Then system shows "Comment is required"
Screenshot	 The screenshot displays a Jira Change Request (CR) interface. At the top, the breadcrumb 'Project Alpha > CR-2024-0852' is visible. The main title is 'Requirement Details'. On the right, there are buttons for 'Reject' and 'Approve', along with a close icon. Below the title, a status bar indicates 'IN DISCUSSION'. The requirement title is 'Integrated Multi-channel Payment Gateway for Mobile Checkout'. The description states: 'To enhance the mobile shopping experience, we need to integrate a unified payment gateway that supports multiple providers including Stripe, PayPal, and Apple Pay directly within the checkout flow.' It lists three bullet points: 'Universal UI: A cohesive payment selector matching the SOLASHI brand.', 'Security: Full PCI-DSS compliance and 3D Secure 2.0 implementation.', and 'Callbacks: Real-time webhook processing for immediate order confirmation.' A note mentions that this CR replaces a previous manual bank transfer method. On the right, an 'ATTRIBUTES' sidebar shows 'Priority' as 'CRITICAL', 'Sprint' as 'Q4_SPRINT_02', 'Start Date' as 'Aug 24, 2024', 'Due Date' as 'Sep 15, 2024', and 'Parent Task' as 'None'. The 'Reporter' is 'Sarah Connor'. The 'ACTIVITY LOG' section shows two comments from 'Dashboard': 'I've reviewed the API documentation for Stripe. We need to confirm if the customer wants to support local payment methods in Japan like Konbini.' and 'Yes, Konbini is a requirement for the first phase. Please include it in the estimation.' There is a text input field for adding a comment and a 'Send Message' button.
